1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-50, drawn to an apparatus for positioning an object, classified in class 269, subclass 55.
- II. Claim 62, drawn to an apparatus for forming a pattern on a substrate, classified in class 425, subclass 174.4.
- III. Claim 167, drawn to a method of forming a pattern on a substrate, classified in class 264, subclass 494.

The inventions are distinct, each from the other because:

Inventions III and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus can be used in other and different processes such as those not using the template to pattern a light curable liquid placed on the substrate—ie, the apparatus can be used to pattern the substrate directly.

Inventions I/II and I/III are considered to be separate or distinct in that they have different utility in the art. For instance, the apparatus for positioning an object within a holder can be used for other than a system or method for patterning a substrate—ie, the apparatus of Group I can be used to move lens systems and electronic devices for optoelectronic applications.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Meyertons on May 230, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mathieu D. Vargot whose telephone number is 571 272-1211. The examiner can normally be reached on Mon-Fri from 9 to 6.
